

SA Fire Protection attain FM Approval on a range of manual, self-oscillating and remote-control monitors

In addition to the Monitor bodies the following accessories were also certified and approved as part of the certification granted to SAFire:

- Jet/ Fog Nozzle for hand lever, hand wheeled and self-oscillating monitors
- Jet/ Fog Nozzle for chain operated monitors
- Jet/ Fog Nozzle for electric monitors
- The Self-Oscillating unit

Each of the above-mentioned products has been rigorously tested by FM engineers to ensure they comply with the highest

standards which are required to tackle exposures and to protect facilities.

Each of the newly FM Approved monitors and their accessories are made from bronze material. The Iguana model is available with a flow rate up to 4000 lpm, whereas the Niagara models are available with much higher flows ranging from 4000 lpm – 20000 lpm.

With the new FM approval the purchaser and contractors can install SAFire Monitors at a host of different facilities with a peace of mind that the fire protection systems installed are to an internationally acceptable standard. The inclusion of such FM Approved equipment ensures that

[Cascina], [ITALY], [08 – 11 – 2019] There is now a large selection of monitors within the extensive range of firefighting monitors in the SAFire portfolio, which have FM Approval.

The FM Approval Certificate of Compliance was for the assembly of the following firefighting monitors:

- Hand Lever Iguana Manual Monitor
- Hand Wheeled Niagara Manual Monitor
- Chain operated Niagara Manual Monitor
- Self-Oscillating Niagara Monitor
- Electric Niagara Remote-Controlled Monitor (SIL2)
